Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

(1) the specifics of a reflector for a reflection-type LCD device comprising plural interconnected protrusions having a first height, depressed areas of a closed geometric shape having a second height less than that of the first, and the shape defined by virtual lines formed at a third height between the first and second heights comprising a first embodiment corresponding to claims 2, 4-8, and 16-18;

(2) the specifics of a reflector for a reflection-type LCD device comprising a reference surface and a layer of organic resin formed on the reference surface having a plurality of spaced apart depressed areas lacking organic resin, where each depression has a closed geometric shape defined by virtual lines at a distance from the reference surface between a top of the layer and a distance that a top of one of the depressed areas is from the reference surface comprising a second embodiment corresponding to claim 19;

(3) the specifics of a reflector for a reflection-type LCD device comprising a no reference layer and a layer of organic resin having a plurality of spaced apart depressed areas lacking organic resin where each area has a definite geometric shape seen in plan view and isolated from each other comprising a third embodiment corresponding to claim 20.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
